

BE-SC 120 SPLIT CORE CURRENT TRANSFORMER

Beemet split core current transformers have been designed such that they can be installed into existing networks without the need to open any cables or busbar circuit.

GENERAL SPECIFICATIONS

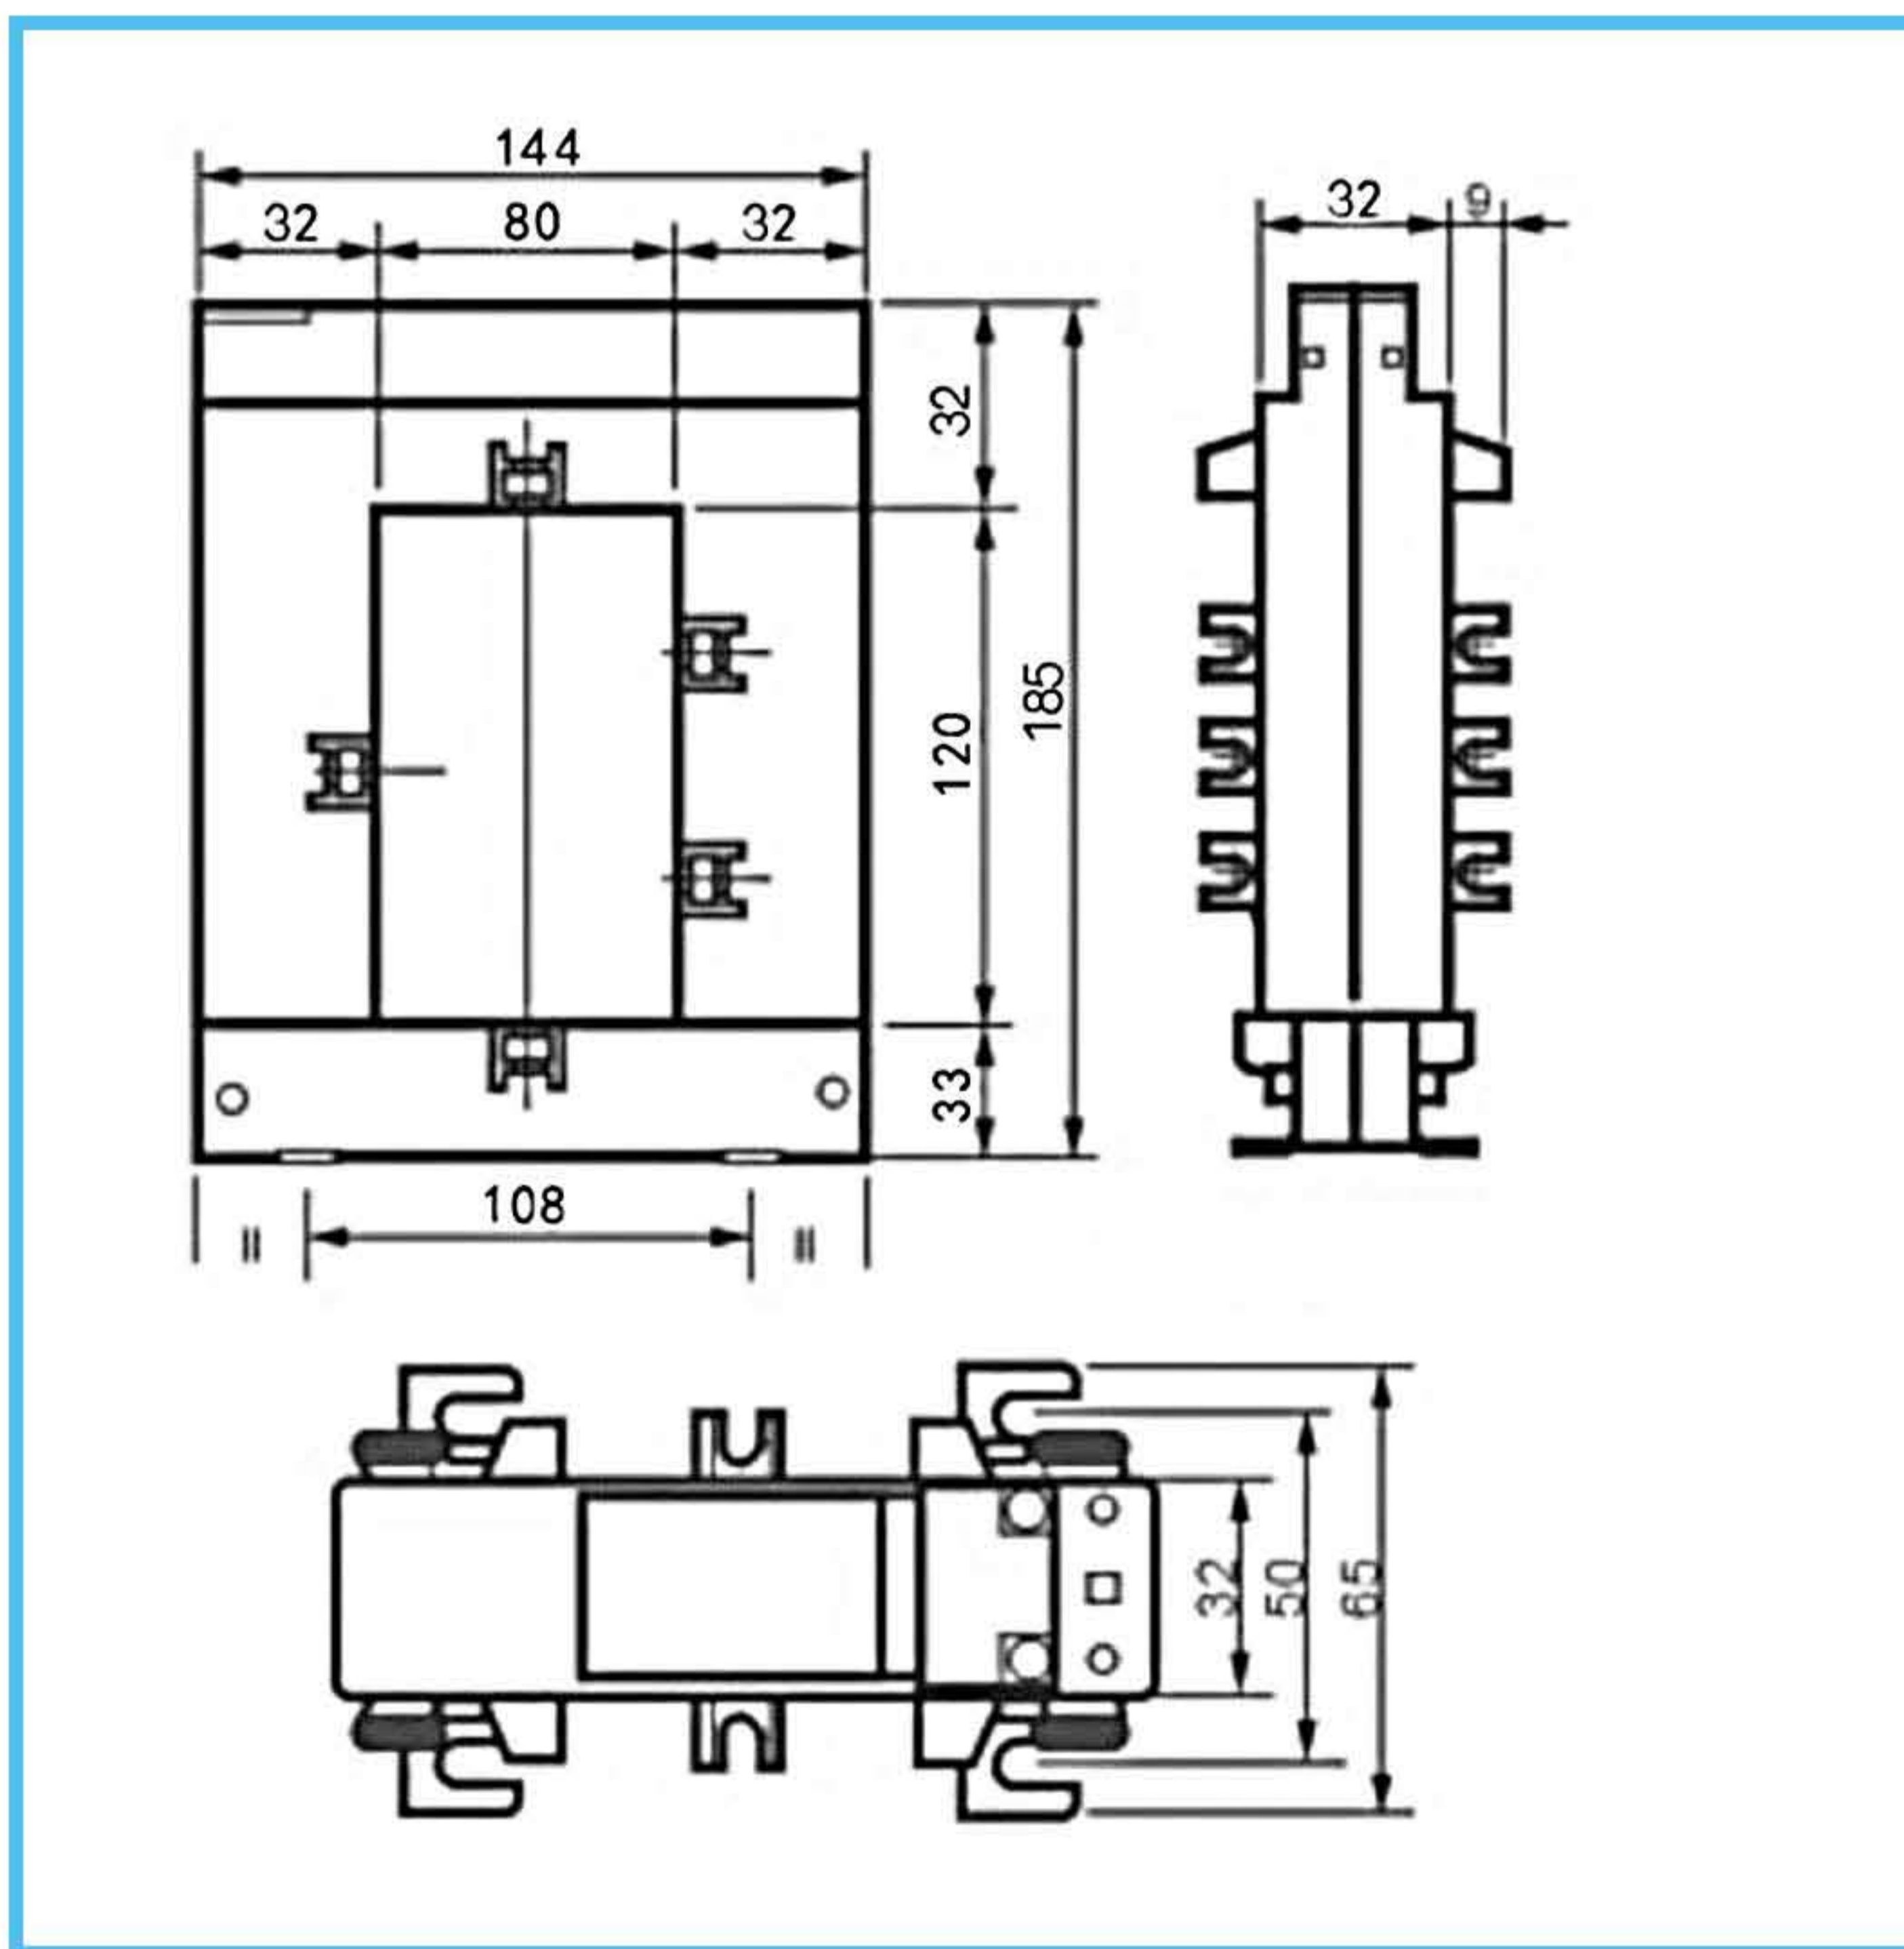

Accuracy Class	$\pm 0.5\%$ of rated output
Primary Current	1250A
Secondary Current	5A
Frequency	50/60Hz
Maximum Voltage	720V
Rated Load	7.5VA
Short-time Thermal Current	$I_{th} = 100 \times I_n$
Rated Security Coefficient	$FS < 5$

SALIENT FEATURES

- Compact size with ease of mounting.
- Wider inner window enables clamping of large cables or busbars
- High accuracy and reliability

DIMENSIONS

Note: All dimensions are in mm.
